

## FOR IMMEDIATE RELEASE

### VJ Electronix Chinese Sales Manager Accepts the Award for ‘The Best Presentation for Vendor Conference VC3’ at NEPCON China

April 2014 — VJ Electronix, Inc., the leader in rework technologies and global provider of advanced X-ray inspection systems, announces that Ren Yang was awarded ‘The Best Presentation of Vendor Conference VC3’ from SMTA China for the presentation titled “Advanced X-ray Inspection Techniques.” The award was presented during the SMTA China East 2014 Conference Award Presentation Ceremony held on April 23, 2014 at the Shanghai World Expo Exhibition & Convention Center in conjunction with the SMTA China Annual Award Ceremony.

This presentation is designed to help the audiences select the correct features and configuration for their X-ray inspection system by understanding how the key parameters affect the outcome of X-ray image quality. Parameters discussed include X-ray power in terms of Kv and mA (Wattage), magnification, image resolution, image grey scale, pixel size, level of automation in report generation, and more. It also intends to break the myth of X-ray spot size and the debate of open tube vs. closed tube X-ray sources. Users are encouraged to select the appropriate technologies, features and configuration by fully understanding the intended application requirement and how all of the key factors affect the outcome in meeting the application needs.

Ren Yang is VJ Electronix’ China Sales Manager. He is a veteran in the PCBA industry, with nearly 20 years of experience in various focuses of SMT production processes such as solder past printing, optical inspection (AOI), chip programming, reflow soldering and vapor phase soldering. Yang obtained his BSEE degree from the Tatung Institute of Technology, Taipei and MSCE degree from the University of Massachusetts in Lowell.
