

FOR IMMEDIATE RELEASE

VJ Electronix to Demo Its XQuik with Material Handling Automation at NEPCON China

March 2018 — VJ Electronix, Inc., a leading global provider of advanced X-ray inspection, component counting systems and PCB rework technologies, will exhibit in Stand 1F32 at NEPCON China, scheduled to take place April 24-26, 2018 at the Shanghai World EXPO Exhibition & Convention Center. The company will demonstrate its XQuik II with AccuCount Technology and Summit 1800i rework system.

The revolutionary XQuik II with AccuCount Technology will be displayed with material handling automation, enabling the system to automatically count components at up to twice the original speed. Parallel processing allows the system to acquire images and calculate component count in parallel with bar code scan, loading and labeling of reels.

The Summit 1800i is an improved version of the world's most popular rework system. VJE has maintained all of the benefits of high efficiency convection heating and the renowned 1-2-3-Go interface, coupled with updated technology for greater reliability and an improved price point. Further refinements enhance the system's performance with ultra - small components like 01005s, while maintaining its capabilities with large boards, oversized CPU sockets, connectors and large BGAs.
