

## FOR IMMEDIATE RELEASE

### VJ Electronix to Show Speed Improvement for Component Counting at NEPCON Shanghai

**March 2019 — VJ Electronix, Inc., the leader in rework technologies and global provider of advanced X-ray inspection and component counting systems, will exhibit in Booth E152 at NEPCON Shanghai 2019, scheduled to take place April 24-26, 2019 at the Shanghai World Expo Exhibition and Convention Center.** The company will demonstrate automated component counting with material handling automation for the XQuik II AutoLoad with AccuCount Technology, along with the industry's most reliable rework system – the Summit 1800i.

The revolutionary XQuik II with AccuCount Technology is now faster than ever. With VJ Electronix material handling automation, the XQuik AutoLoad system automatically counts components and eliminates all dead time, significantly reducing the cycle time to count and disposition reels. New parallel processing techniques allow the system to acquire images and calculate component count in parallel with bar code scan, loading and labeling of reels. The revolutionary XQuik II and XQII AutoLoad with AccuCount Technology remain best-in-class.

The industry-leading Summit 1800i is an improved version of the world's most popular rework system. VJE has maintained all of the benefits of high efficiency convection heating and the renowned 1-2-3-Go interface, coupled with updated technology for greater reliability and an improved price point. Further refinements enhance the system's performance with ultra - small components like 01005s, while maintaining its capabilities with large boards, oversized CPU sockets, connectors and large BGAs up to 100x100mm.

###

#### About VJ Electronix

VJ Electronix, Inc. manufactures production ready, automated Rework and X-ray inspection systems with many advanced capabilities. The company frequently provides custom solutions tailored to satisfy specific application requirements. VJ Electronix is a worldwide leader in X-ray Inspection and Rework equipment.
