

FOR IMMEDIATE RELEASE**Material Handling Automation and Semi-Automated Rework from VJ Electronix at productronica**

October 2017 — VJ Electronix, Inc., the leader in rework technologies and global provider of advanced X-ray inspection and component counting systems, will exhibit in Hall A3, Booth 102/5 at productronica 2017, scheduled to take place Nov. 14 – 17, 2017 at the Messe München in Germany.

The company will demonstrate material handling automation for the XQuik II AutoLoad with AccuCount Technology, along with the Summit II rework system. Additionally, an XQuik II with AccuCount Technology will be on display in the SmartRep GmbH stand. SmartRep was recently appointed as the company's distributor throughout Germany and Austria.

With newly introduced material handling automation, the XQuik AutoLoad system automatically counts components at up to twice the original speed. New parallel processing techniques allow the system to acquire images and calculate component count in parallel with bar code scan, loading and labeling of reels. The revolutionary XQuik II and XQII AutoLoad with AccuCount Technology are now faster than ever.

The Summit II is the latest semi-automated rework system from VJ Electronix. Improved ergonomics combined with next-generation controls and proven heating technology provides even better performance and flexibility. Summit II features a smaller footprint, yet larger board capacity with easy to adjust board support fixtures. Enhanced SierraMate software takes the popular user-friendly operation to the next level with a simple icon driven GUI and unmatched flexibility through easily customized operation sequences.
