Press Release – For Immediate Release

VJ Technologies Europe Awarded ISO Re-Certification

Bohemia, New York, 24 January 2012 – VJ Technologies Europe, an industry leader in the development of high-energy X-ray inspection services and products in Europe announced today that it successfully passed all audits for ISO 9001 re-certification. VJT Europe is a subsidiary of VJ Technologies, Inc.

ISO 9001 is a most rigid certification for process qualifications and is intended for use in an organization which designs, develops, manufactures, installs and/or services any product or provides any form of service. ISO 9001 provides customers with objective proof that the compliant company has an effective quality management system in place and that all of the quality standards' requirements are met. VJ Europe initially passed certification in 2008 with an annual intermediary audit and has modified its procedures for new compliance.

"ISO 9001 is an important element in our continuing quest to provide the highest quality imaging solutions and world class In Field services." said VJ Europe director Apostolos Christodoulou. "It will position us better in the aerospace, automotive and nuclear inspection sectors of the European market".

VJT inspection systems are utilized to inspect and detect voids and anomalies in components and materials. In addition to 'turn-key' systems and services, VJT Europe also provides engineering skills and project management

About VJ Technologies Europe

VJ Technologies Europe, headquartered in Epinay sous Senart, France, develops and markets advanced automated X-ray inspection systems for the aerospace and nuclear sectors.

The company is a division of VJ Technologies Inc. (VJT), a leading global supplier of industrial high-energy x-ray solutions and systems. Founded in 1987, VJT has developed state-of-the-art inspection systems for a wide variety of industries and has offices throughout the USA as well as manufacturing facilities in India and China.
